

Ayesha Khan

Applicant for ML/AI Intern · 7th Semester

Skills: Python, Pandas, NumPy, Scikit-learn, SQL, Git, GitHub, Streamlit

Customer Churn Prediction.

Using Python, Pandas and NumPy, cleaned and preprocessed customer data, handled missing values and categorical variables, and performed feature engineering.

Trained Logistic Regression and Random Forest models using a train-test split and compared their performance.

Evaluated models using accuracy, precision, recall, F1-score and ROC-AUC and selected the final model based on evaluation results.

Built a Streamlit prediction interface and published the project to GitHub with documentation.
