Applicant for DevOps Intern · Graduated

Skills: Linux, Bash, Git, GitHub, Docker, Kubernetes, GitHub Actions, AWS, Nginx, Prometheus, Grafana

Containerized Deployment Project.

Containerized a web application with Docker and configured Docker Compose for local services.

Created a GitHub Actions CI/CD pipeline to run tests and automate deployment.

Deployed the application to AWS, configured Nginx as a reverse proxy, and used HTTPS.

Monitored application metrics with Prometheus and Grafana and documented the project on GitHub.
