

Ayesha Khan

BS Computer Science - 7th Semester

Skills: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Git, GitHub, SQL

Customer Churn Prediction

Cleaned and preprocessed customer data, handled missing values and categorical variables, trained Logistic Regression and Random Forest models, and evaluated them using accuracy, precision, recall and F1-score.

Student Performance Predictor

Performed exploratory data analysis and feature engineering, trained classification models using Scikit-learn, created a confusion matrix and classification report, and built a Streamlit prediction interface.

Sales Analysis

Used Pandas and NumPy for data cleaning and analysis, SQL for queries, and Matplotlib for visualizations.

Uses Git and GitHub for university and personal projects.
