

Sara Ahmed

BS Computer Science - 7th Semester

Skills: Python, Pandas, NumPy, Scikit-learn, Matplotlib, SQL, Git, GitHub, Streamlit

Loan Default Prediction System

Worked with approximately 8000 records. Inspected missing values and class imbalance, cleaned and transformed the data, encoded categorical variables, and performed feature selection.

Compared Logistic Regression, Decision Tree and Random Forest using a train-test split.

Evaluated models using accuracy, precision, recall, F1-score and ROC-AUC. Recall was prioritized because false negatives were more costly for the problem.

Built a Streamlit interface and published the project to GitHub with documentation.
